**Use Route4Me to dramatically
improve your operations in 2017.**

**Streamline your operations and
prevent wasteful activities.**

#1: Make Training Faster And Easier

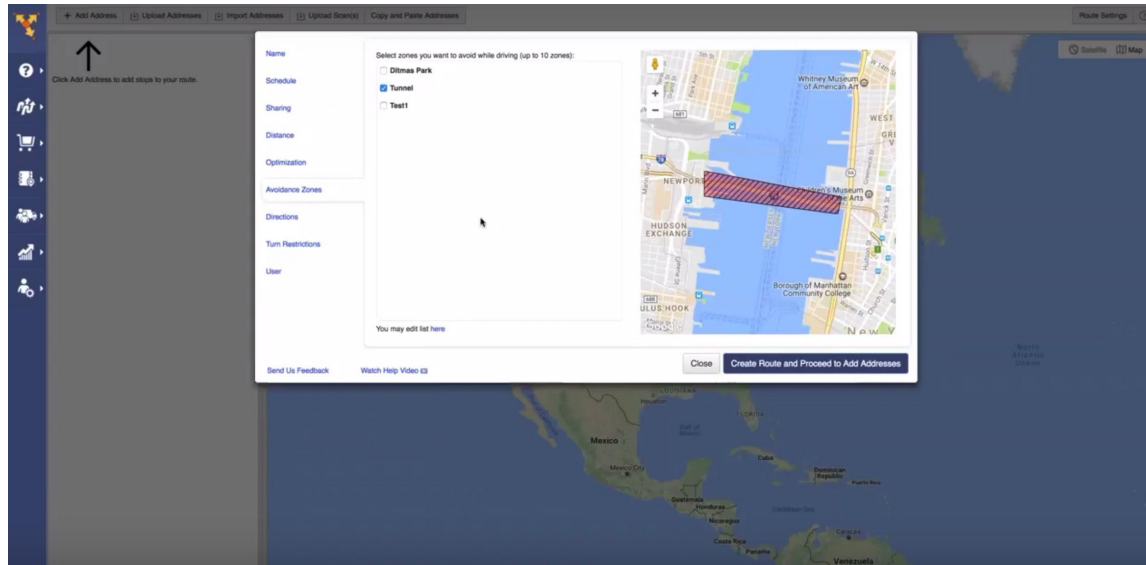

Use Route4Me's GPS tracking feature to guarantee that your drivers are doing what they're supposed to do.

Immediately find out if your drivers are doing something wrong, so you can correct them as quickly as possible. This makes your training more proactive rather than reactive.

#2:

Track And Monitor Drivers With GPS Tracking

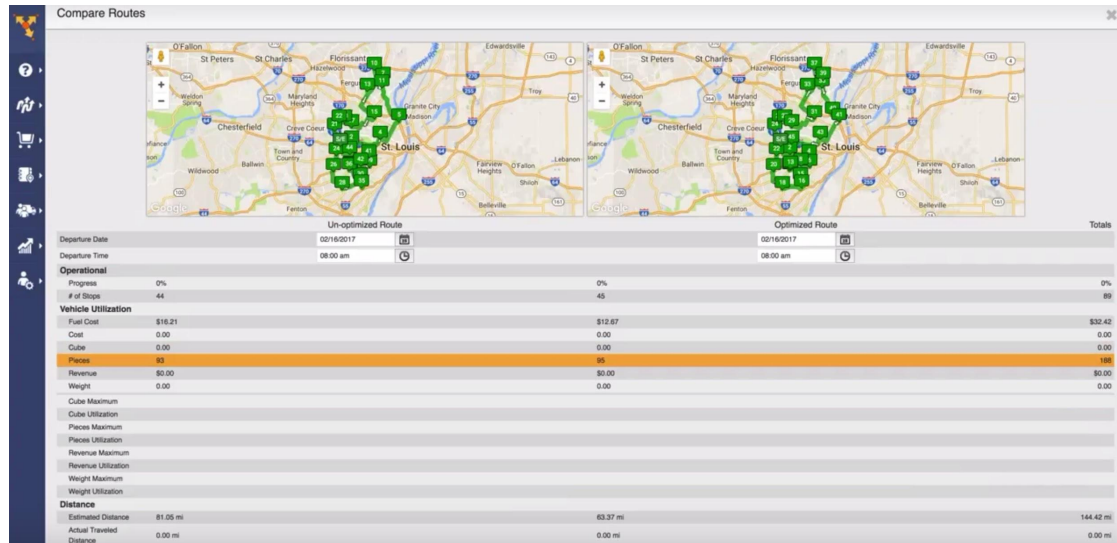

Check if your drivers are not doing the routes they are assigned to.

Route4Me can detect if drivers are almost always being delayed in particular areas. So in the future, they can avoid these places.

#3:

Shave Off Mountains Of Time From Your Drivers Through Route Optimization

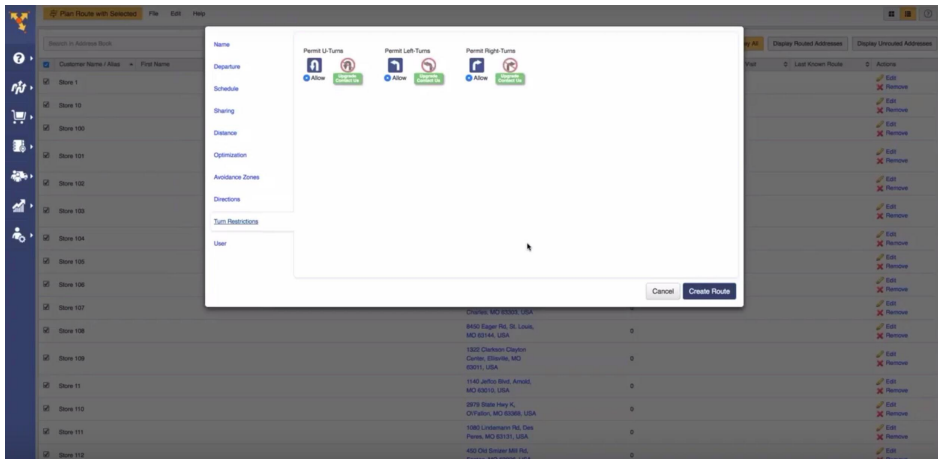

See the Significant Difference Between
A Non-Optimized Route Versus An Optimized Route

#4: Create Incremental Improvements In Your Drivers Using Route4Me's Additional Features

Route4Me's time windows will make sure your drivers are in particular locations at particular times.

Its geofencing and auto log-in/-out also minimizes the time your drivers spend on paperwork to track their progress within the day. In addition, Route4Me, can, for example, make drivers avoid turning left.

#5:

Decrease The Level Of Bad Deliveries

Bad deliveries occur when a driver can't seem to find their destination or they arrive at the location and no one is around. Drivers can reflect this on their delivery notes.

With Route4Me, you can give customers a particular time when your driver will show up. You can keep your promise to them using Route4Me's time windows. You can even receive notifications via text when your driver is close to their destination.

A faint, light-colored map of New Orleans is visible in the background, showing streets, parks, and landmarks like the Mississippi River and the French Quarter.
