Same-Day Delivery Gives You A Competitive Advantage

Offering same-day delivery allows you to stand out from the competition. It gives customers a good reason to choose you over all their other options.

But how are you going to pull this off? Your organization must be extremely efficient if you're going to receive an order, prepare it, and deliver it on the same day.

Unlock Your Company's True Potential With Same Day Delivery Software

Route optimization software makes same day delivery possible.

Such software guarantees that every route you give your drivers is the most efficient route possible. Your drivers will have everything they need to make it to the customer on time.

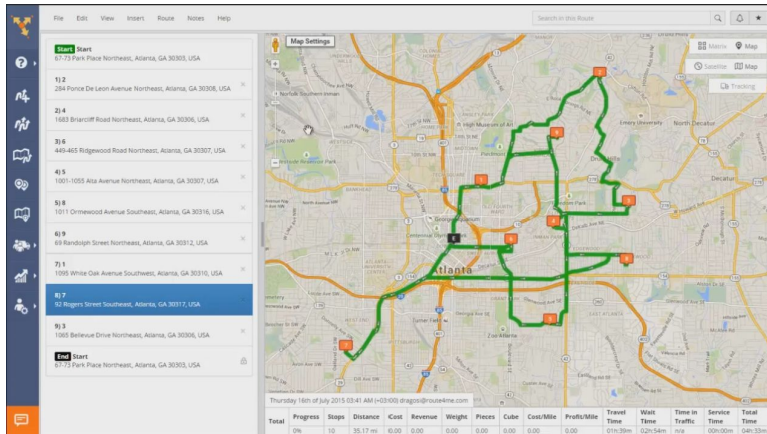

Adjust And Re-Optimize Routes On The Fly

Planning routes with pen and paper is incredibly time-consuming. It often takes hours. If you need to add or remove a stop at the last minute, that affects how you approach the rest of the stops on your route. You'll pretty much have to start from scratch. There's a few more hours down the drain...

Same day delivery software eliminates this issue. To make a route, all you need to do is plug in your customers' addresses, and your route will be ready in 30 seconds or less. And if you add or remove a few stops from the route, it'll only take 30 seconds or less to re-optimize the route.

Avoid Left Turns And U-Turns

Same day delivery software has other features that will make your drivers more productive.

For example, you can set it up so that your routes don't have any left turns or U-turns. These types of turns are a huge waste of time and gas, as your drivers don't have the right of way and need to wait for traffic to clear before they can go.

Track Your Packages And Monitor Your Drivers

Optimized routes won't do you much good if your drivers don't actually follow the routes you give them.

That's why you need to make sure the route planner you invest in has a GPS tracking feature. That way, you'll know exactly where your drivers at all times. Whenever you want, you can check in on a driver to see if they're sticking to their route and staying on schedule.

Keep Your Customers Happy And Expand Your Business

Route optimization software makes it easier for your drivers to show up on time.

Your customers will love that. They'll love it so much, in fact, that they'll recommend your service to their friends and family. These personal recommendations are much more persuasive than blatant advertising. It's the best way to attract new customers to your business.

Overall, same day delivery software allows you to save time, save gas, and make more money.

A faint, light-colored map of New Orleans is visible in the background, showing streets, parks, and landmarks like the Metairie Cemetery and New Orleans Country Club.
